## We strive for perfection for your collection

The main focus when designing a museum solution is to preserve your valuable and irreplaceable collection. Conservation is the key word where museum repositories are concerned. In addition, the collection should be accessible at all times. After all, we believe that the perfect preservation of your collection and optimum accessibility go hand in hand.

With our Bruynzeel ArteStore museum range we are confident Bruynzeel will have the solution to best meet your needs.

## Description

**Mobile painting frames from Bruynzeel, also known as Compactus® ArteStore painting frames, make optimal use of the available space by using only a single aisle. The mobile frames can be moved singly or with more than one at the same time, creating an aisle wherever necessary. You almost double your storage capacity.**

Mobile painting frames: store different objects in one system

In one mobile painting frame system, bases fitted with mesh panels can be combined with bases fitted with shelves, drawers, or other accessories. You are able to store many different objects in one system.

Three different drive options

Compactus® ArteStore mobile painting can be equipped with an electronic Compactus® Dynamic XTR or Compactus® Dynamic Pro XTR drive and a manual Compactus® Original XTR.

Optimal protection of your collection

In addition to maximum storage capacity, Compactus® Dynamic XTR and Compactus® Dynamic Pro XTR will also provide optimal protection of your collection.

- You realise low-vibration movement of the mobiles thanks to 'soft start' and 'soft stop'.
- To guarantee increased ventilation for your collection, Compactus® Dynamic XTR and Compactus® Dynamic Pro XTR can be programmed with a night mode setting.
